This list was correct at the time of preparation, though some details may have changed since then. It is not intended to be complete or exhaustive, but includes most of the commonly-used risk tools currently available. Specialist tools with limited application areas are excluded. Inclusion on this list does not imply endorsement by Risk Doctor & Partners, and conversely omission does not imply any criticism.

If you are aware of inaccuracies or omissions, please let us know at contact@risk-doctor.com.
